

July 11, 2002

Valentina,

Your assistance as a professional translator and Assistant Director for Doctors Without Walls in Moscow would be greatly appreciated if you would do the following. As you know I have filed a Premarket Notification for Extrabiolat...I am calling it Del-Immune in the United States. The people in the FDA have requested more information. The requested information is not complicated and is readily available. The problem is that Valerie Vospyakov has been assisting the St Petersburg police with some type of criminal murder and at the moment very difficult to reach.

Would you call Valerie and just ask him the following two questions and then e-mail his answers to me asap ?

Please note in your call to Valerie the date and time plus his answers.

Thank you a million...

John Sichel

John,  
just after I received your message I called Valery to help you and us speed up our project...

He is really very difficult to talk to and doesn't listen to you but only listen to himself.

After ten times asking him about the info he needs to send to you to let things go ahead, I managed to get his answer saying he is getting it ready and will send it to you partially today and the rest tomorrow.

then he said that those people who came to St.Pet recently from the US (probably you know about them) asked him to give the Prepareate for treating Anton Smatka's son in law because he is sick and Valery didn't give them anything, so if he is really sick Valery ask you if you can help and give him some prepareate...but more details he promised to send to you later in the e-mail.

If you need any other help from me let me know.

I miss my Olly very much and looking forward to see her on Saturday.

You said smth. about difficulties to get visas here but I have friends in

the travel agency who can easily make a travel voucher for 1 month travelling for 30 dollar and send it by fax the same day to you, if there is any need for it/

I am busy as a bee at work trying to arrange another huge conference etc.

My kisses and hugs to you and the pups..

Valya.

FROM VALENTINA  
AFTER CONTACTING  
VALERIE VOSPUKON.

John,

I spoke to Vaery Vospuakon today 12.07.2002 at half past two and asked him two required questions.

I hope they will be useful and help to speed up the procedure.

Best regards,

Valentina Mouravykh.
